\*Cabbage palms must be used in groupings of 3 to count towards a single canopy tree. Palms can only be used for up to 30% of the required number of canopy trees.

\*\*Not a good buffer shrub, becomes leggy over time.

Note: These are examples of plant material that would meet the native requirement of 4.06.00 of the LDC which requires the plant to be native to Florida and vouchered in Palm Beach County southward on the East Coast and in Counties South of Lake Okeechobee and the Caloosahatchee River on the West Coast.
